Disability Confident Workforces

An eLearning module

About

This eLearning course will assist you and your team members to be disability confident every day at work.

Our members have often told us they'd love all their employees to do our acclaimed Disability Confidence Workforces training.

While there's no substitute for a face to face facilitated session, we have adapted the content from our highly regarded session to create the Disability Confident Workforces eLearning module.

The Disability Confident Workforce eLearning module includes 3 Chapters of self-paced learning:

Chapter 1: About Disability

- ❖ What disability confidence is, and why it matters
- ❖ The business case for inclusion
- ❖ Understanding disability in Australia
- ❖ Current legislation, and what direct and indirect discrimination is

Chapter 2: Communication and Key Concepts

- ❖ The importance of inclusive language
- ❖ Understanding privacy and sharing information
- ❖ Understanding workplace adjustments and essential requirements

Chapter 3: Creating Enabling Environments

- ❖ How to create accessible documents
- ❖ How to plan for and run inclusive meetings and events
- ❖ How to ensure everyone has an inclusive experience
- ❖ The role of every team member and how to create enabling team environments

You can now easily build the disability confidence of all employees, across Australia

AUSTRALIAN
NETWORK
ON DISABILITY

The eLearning module is available to members and non members of the Australian Network on Disability.
